

BESTPUMP ALLSTAR XI

**AN UNBEATABLE LINE-UP
OF FOOD GRADE PUMPS
FROM THE BEST TEAM!**

2 CENTRIFUGAL

Very effective in the transfer of thin liquids like water, milk & oils. Performs well on juice & brewery duties.

1 THE BLOCKBUSTER

Munches blocks of product then pumps & extrudes. Ideal for unpumpable products like chilled butter!

4 ROTARY LOBE

Low-shear positive displacement pump for a vast range of fluids & slurries.

5 CIRCUMFERENTIAL PISTON

Gentle solids handling positive displacement pump. Great on high viscosity media. 31 bar maximum pressure.

3 DRUM & IBC

Transfer fluids or non-flowing pastes & gels from drums, IBCs and other containers.

6 GEAR

Tough, durable and reliable. Used widely for oils and chocolate applications.

8 TWIN SCREW

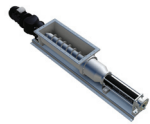

Amazing speed range. Able to do both CIP **AND** process duties. Gentle solids handling. Up to 50 bar pressure.

7 FLEXIBLE IMPELLER

Dry self-priming pump. Versatile, adaptable and offering gentle handling with a steady, pulse-free flow.

9 PROGRESSIVE CAVITY

Strong suction lift ability and can handle a wide range of liquids and slurries. Smooth flow with no pulsing.

10 DOUBLE DIAPHRAGM

Self-priming and ultra-versatile. Ideal for suction-lift duties. Good for thin & thick fluids even with solids.

11 PERISTALTIC

Self-priming, low-shear pump with strong suction lift capabilities. No need for seals.
